1. Download and install XAMPP.

The image shows a two-part screenshot of a web browser. The top part shows a Yahoo search results page for 'xampp'. The search results include links to 'XAMPP Installers and Downloads for Apache Friends', 'What Is Xampp For', 'Download XAMPP', 'XAMPP | SourceForge.net', and 'XAMPP - Free download and software reviews - CNET...'. The bottom part shows the official XAMPP website at 'https://www.apachefriends.org/index.html'. The website has a navigation bar with 'Download', 'Add-ons', 'Hosting', 'Community', and 'About'. The main content area features the XAMPP logo and the text 'XAMPP Apache + MySQL + PHP + Perl'. Below this, it says 'What is XAMPP?' and 'XAMPP is the most popular PHP development environment'. A video player shows a video titled 'XAMPP'. At the bottom, there are three download buttons: 'Download' (with a link to other versions), 'XAMPP for Windows v5.6.8 (PHP 5.6.8)', 'XAMPP for Linux v5.6.8 (PHP 5.6.8)', and 'XAMPP for OS X v5.6.8 (PHP 5.6.8)'.

XAMPP Apache + MySQL + PHP + Perl

What is XAMPP?
XAMPP is the most popular PHP development environment
XAMPP is a completely free, easy to install Apache distribution containing MySQL, PHP, and Perl. The XAMPP open source package has been set up to be incredibly easy to install and to use.

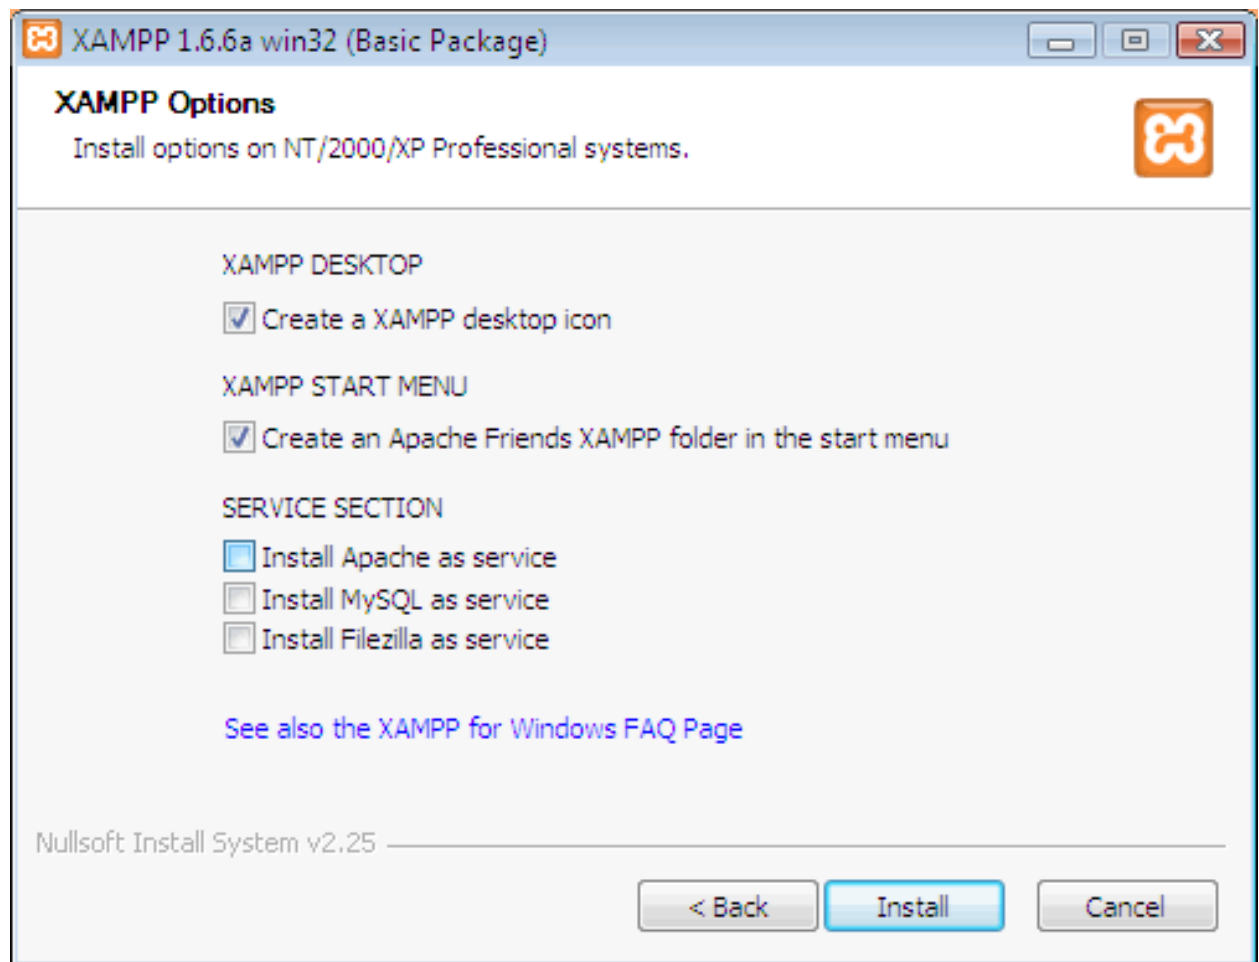

Download
Click here for other versions

XAMPP for Windows
v5.6.8 (PHP 5.6.8)

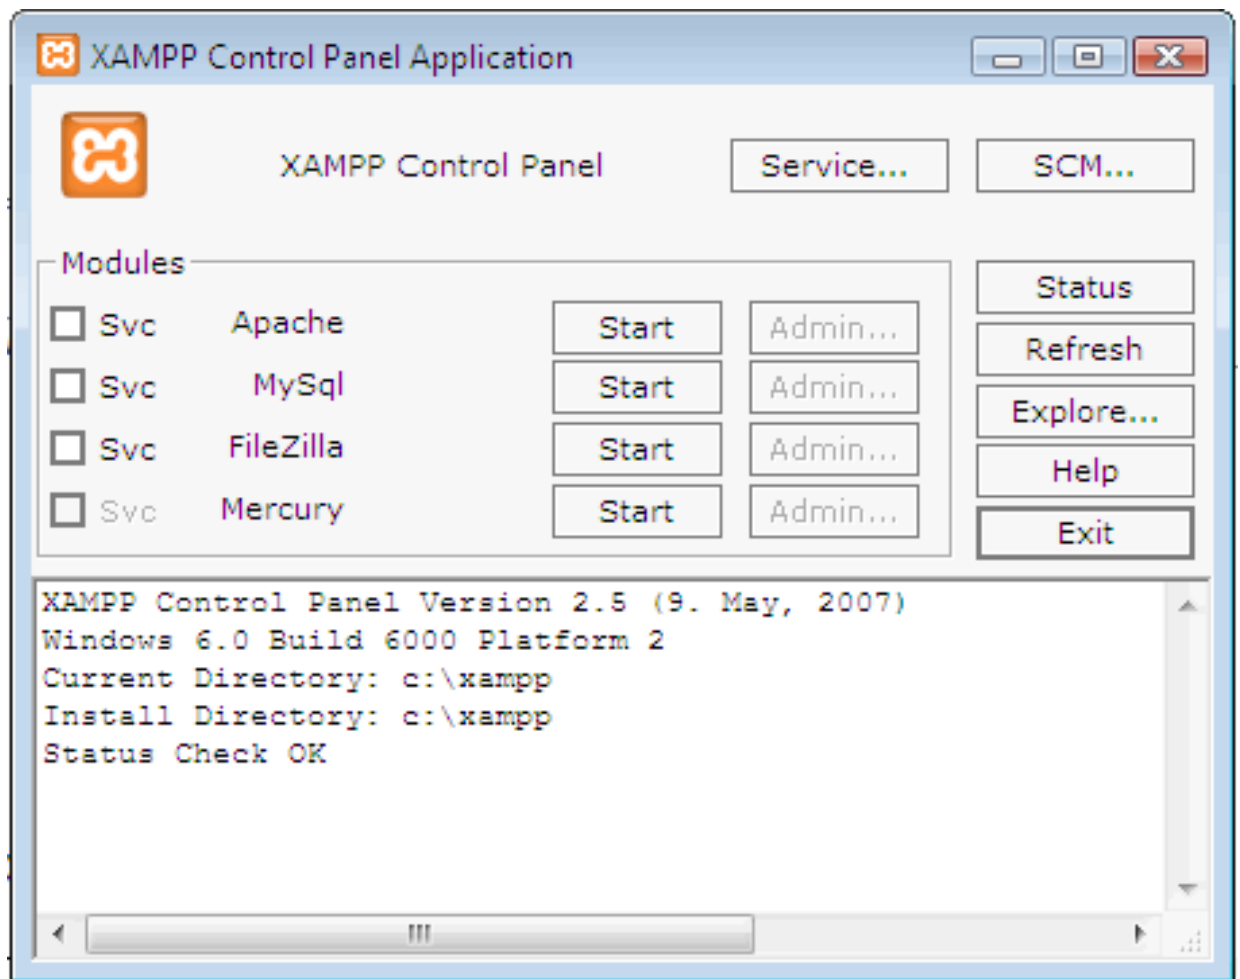

XAMPP for Linux
v5.6.8 (PHP 5.6.8)

XAMPP for OS X
v5.6.8 (PHP 5.6.8)

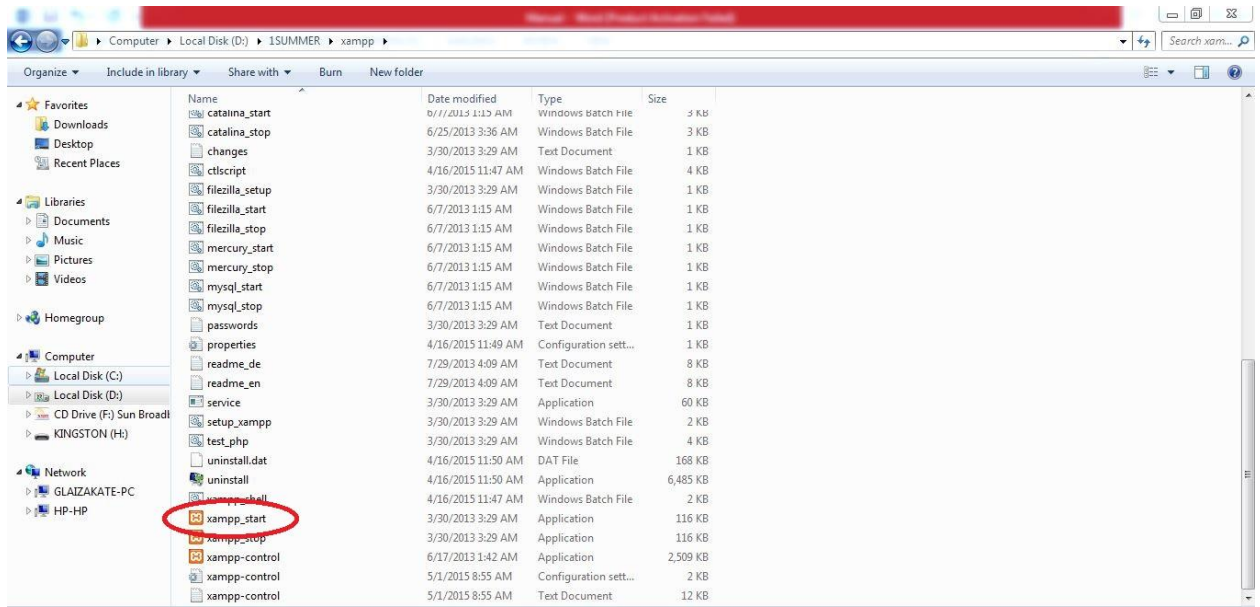

2. Install xampp or the .exe file. Select language you'd like to use. If a warning appears, just click "allow".
3. Click Ok. Then "Next" twice.
4. Click Install.

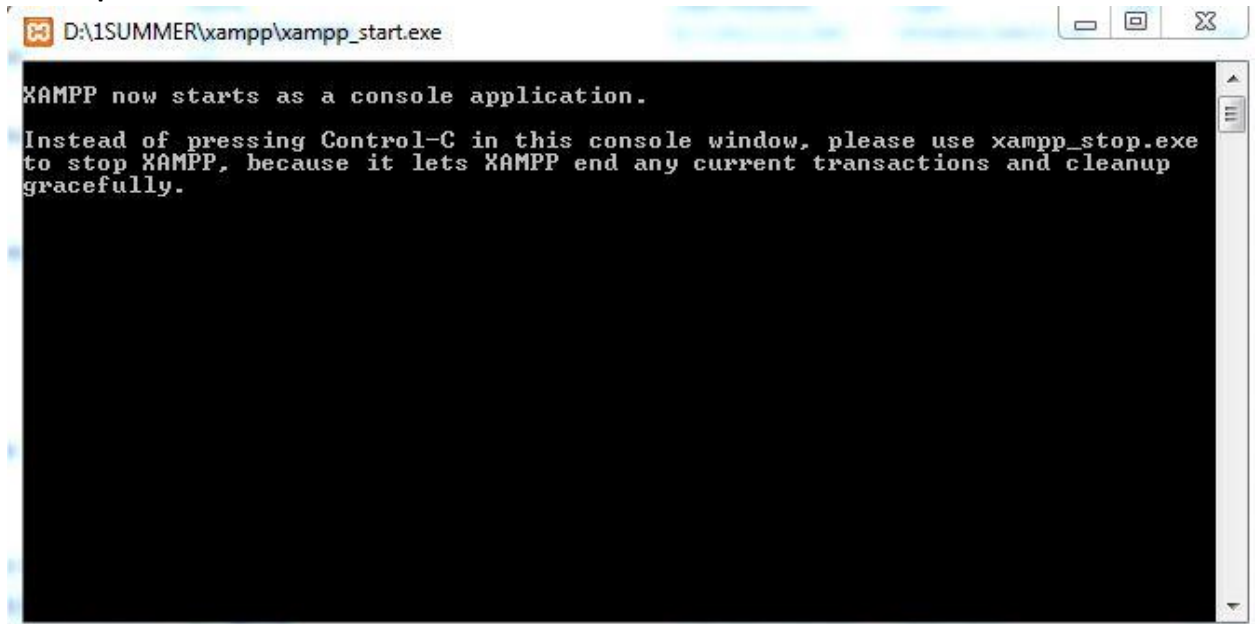

5. Then click "Finish".
6. Click "Yes" to open XAMPP Control Panel.

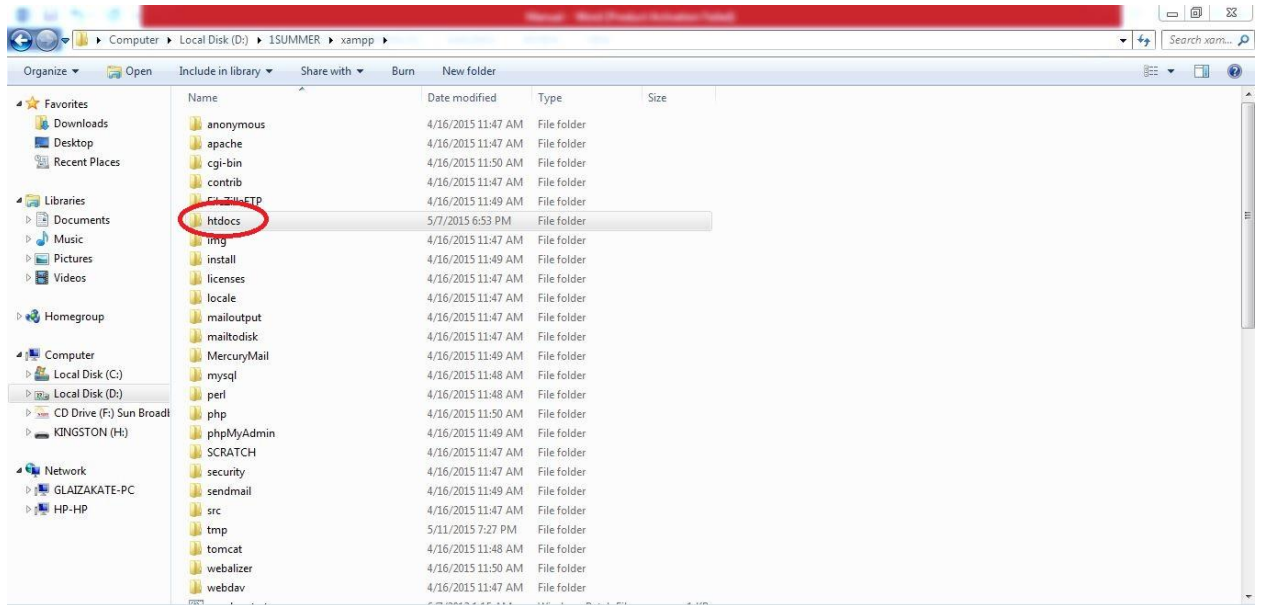

7. Click "Start" beside the Apache and MySQL to start xampp or go to the installation_folder_destination/xampp, double click xampp_start.

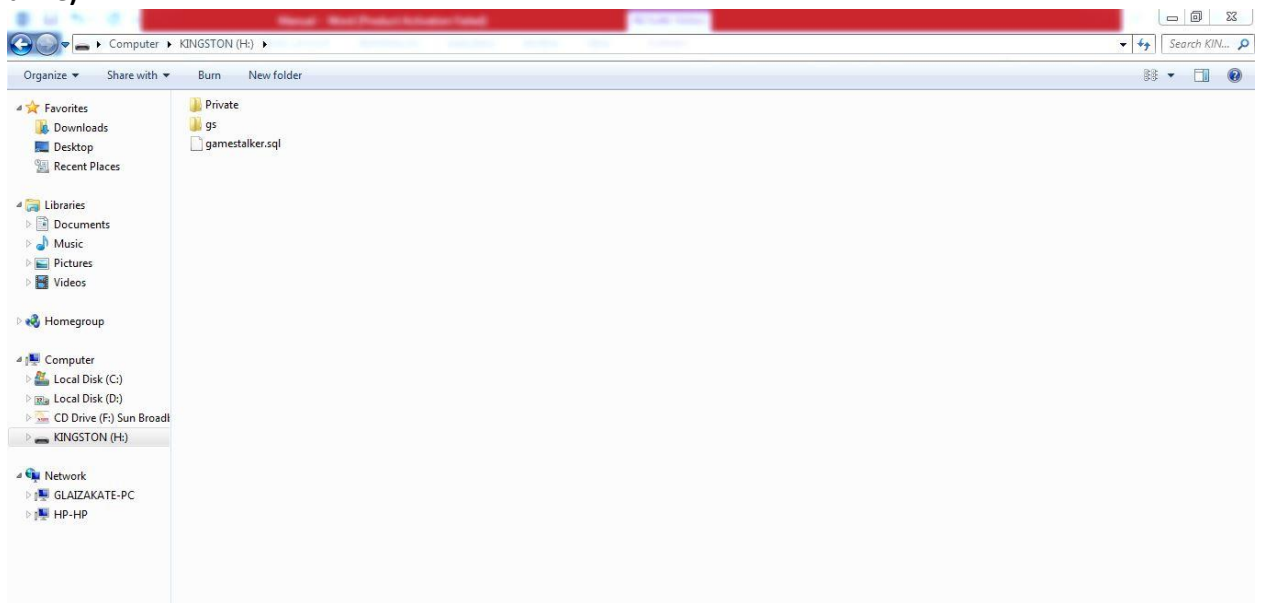

It will open this.

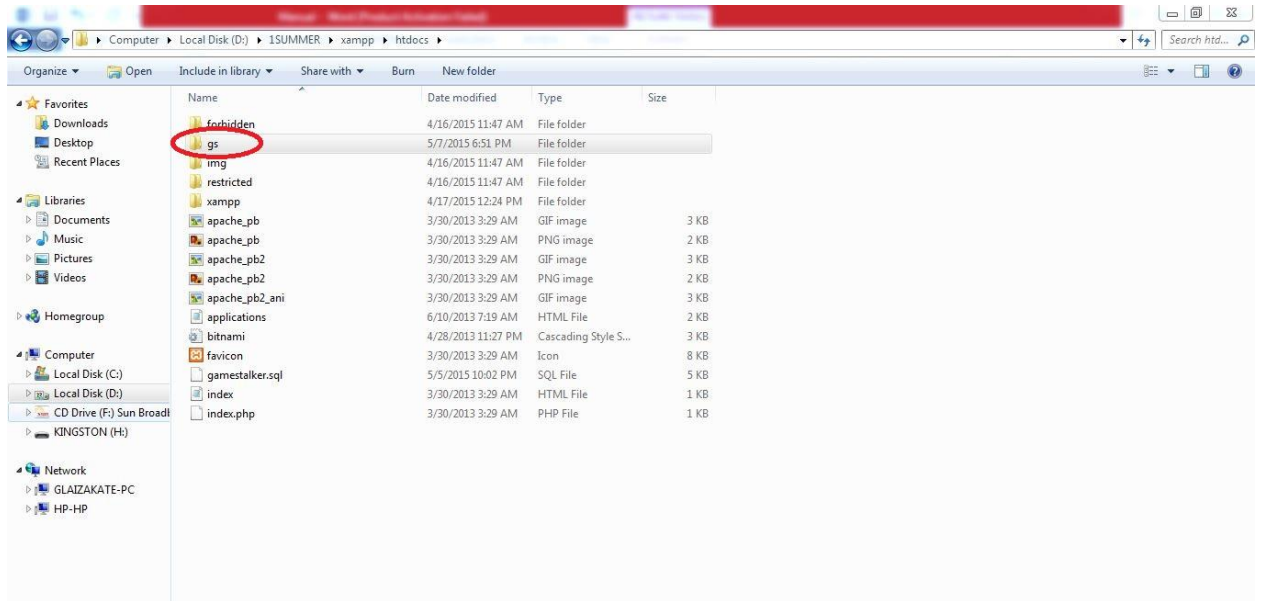

8. Open "installation_folder_destination/xampp/htdocs".

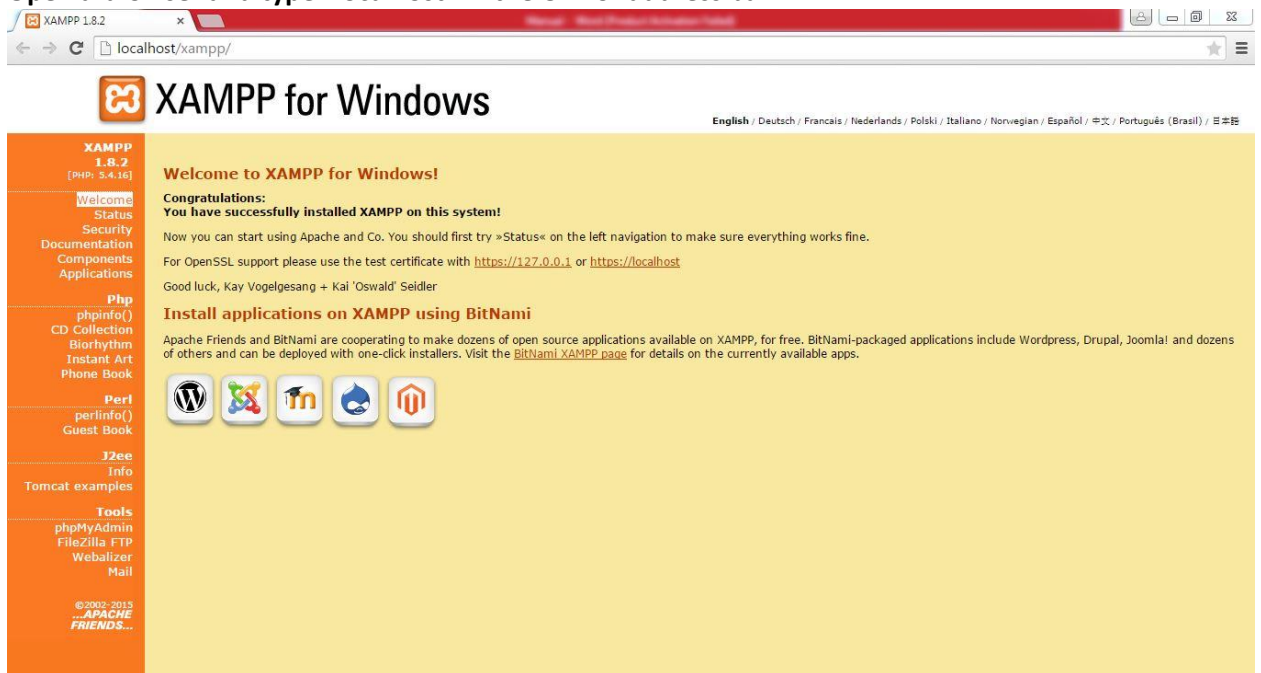

9. In other window, open the folder where the installation files are. (Flash Drive or CD/DVD drive).

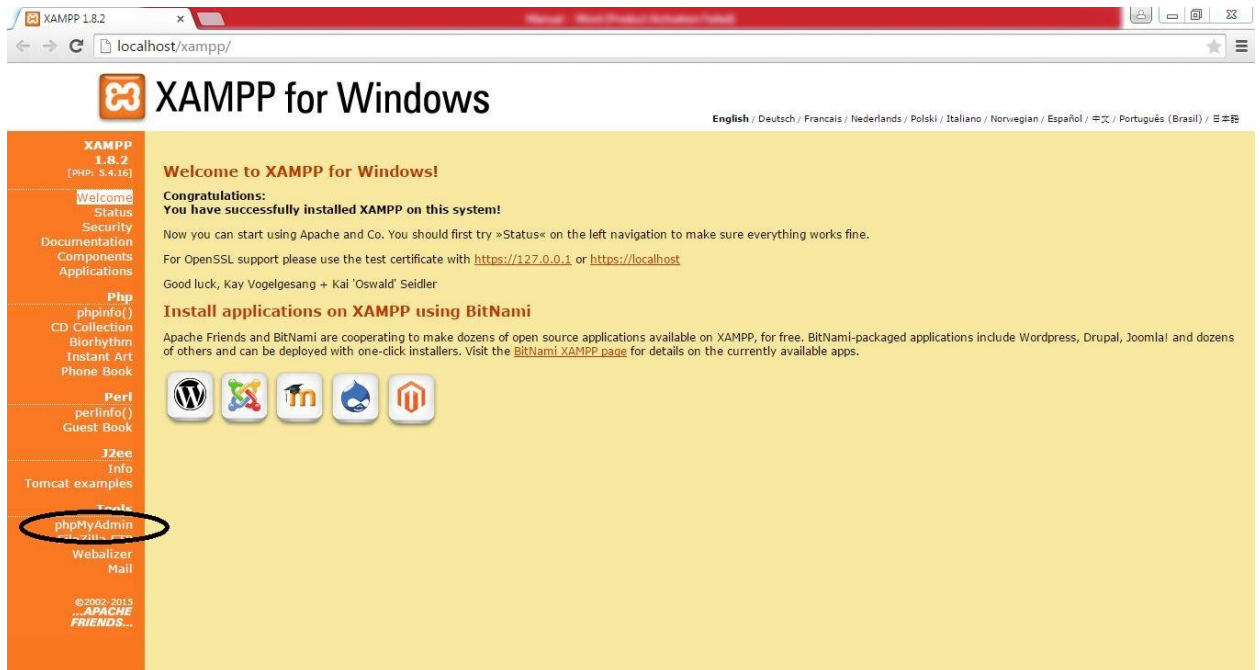

10. Copy and paste installation folder to "installation_folder_destination/xampp/htdocs".

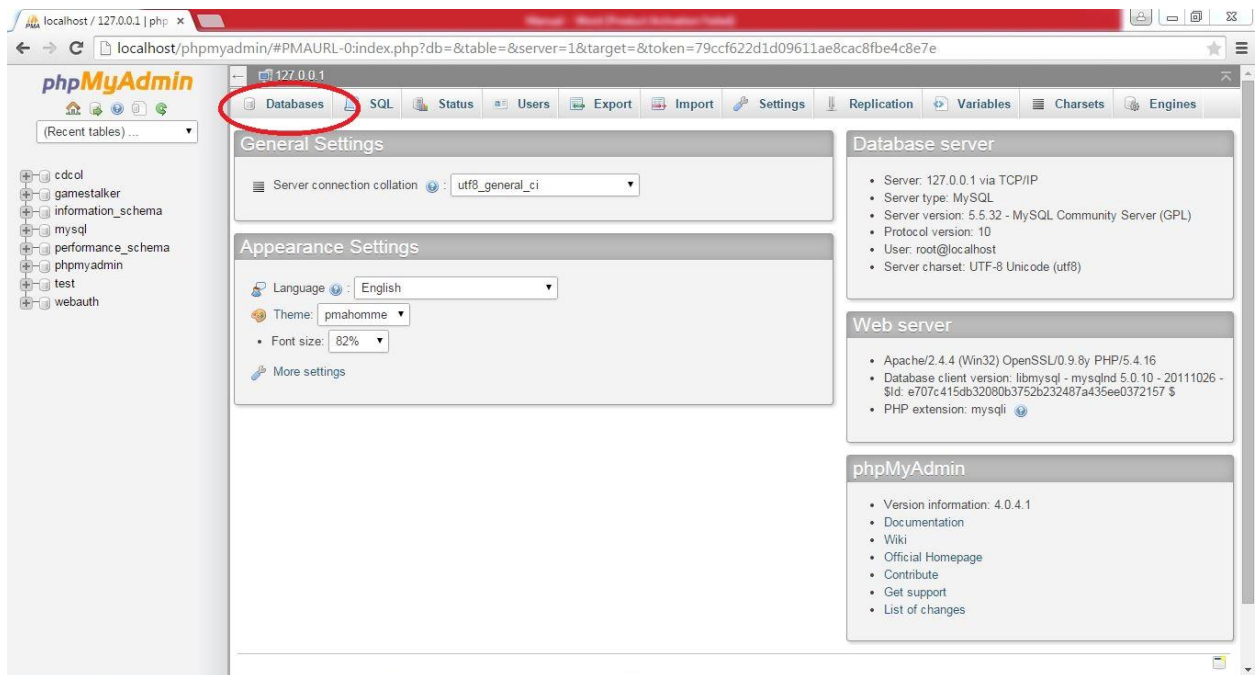

11. Open a browser and type “localhost” in the URL or address bar.

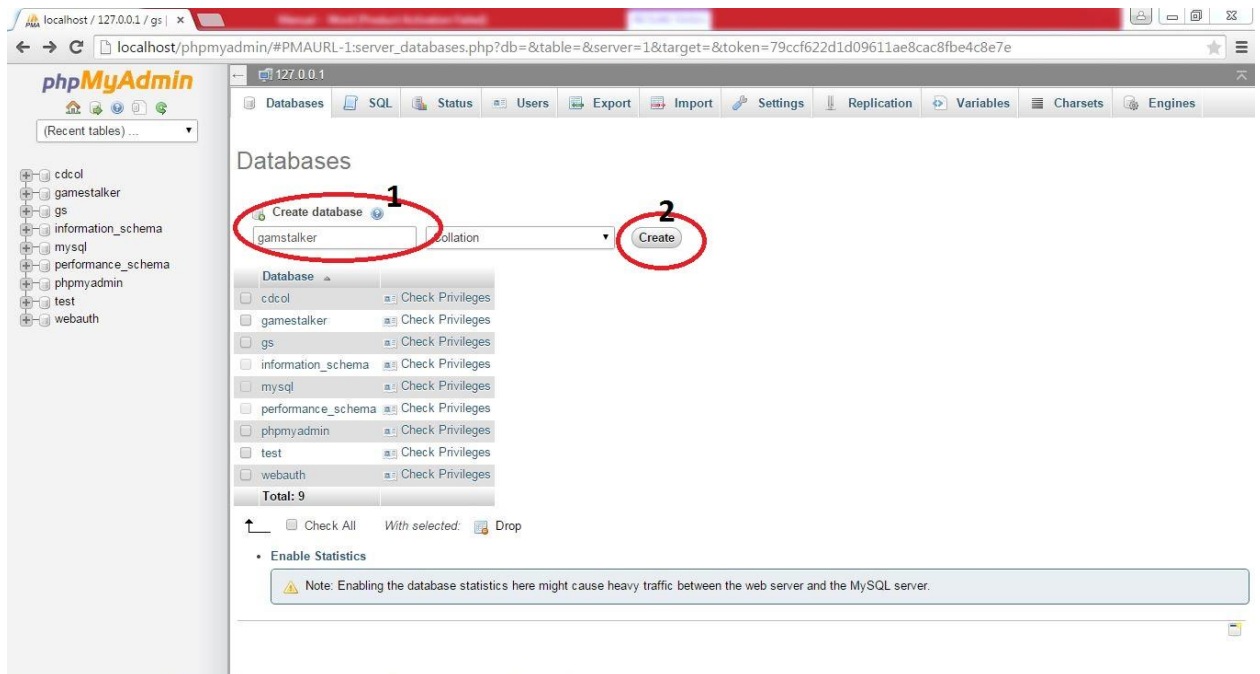

12. Click on “phpMyadmin”

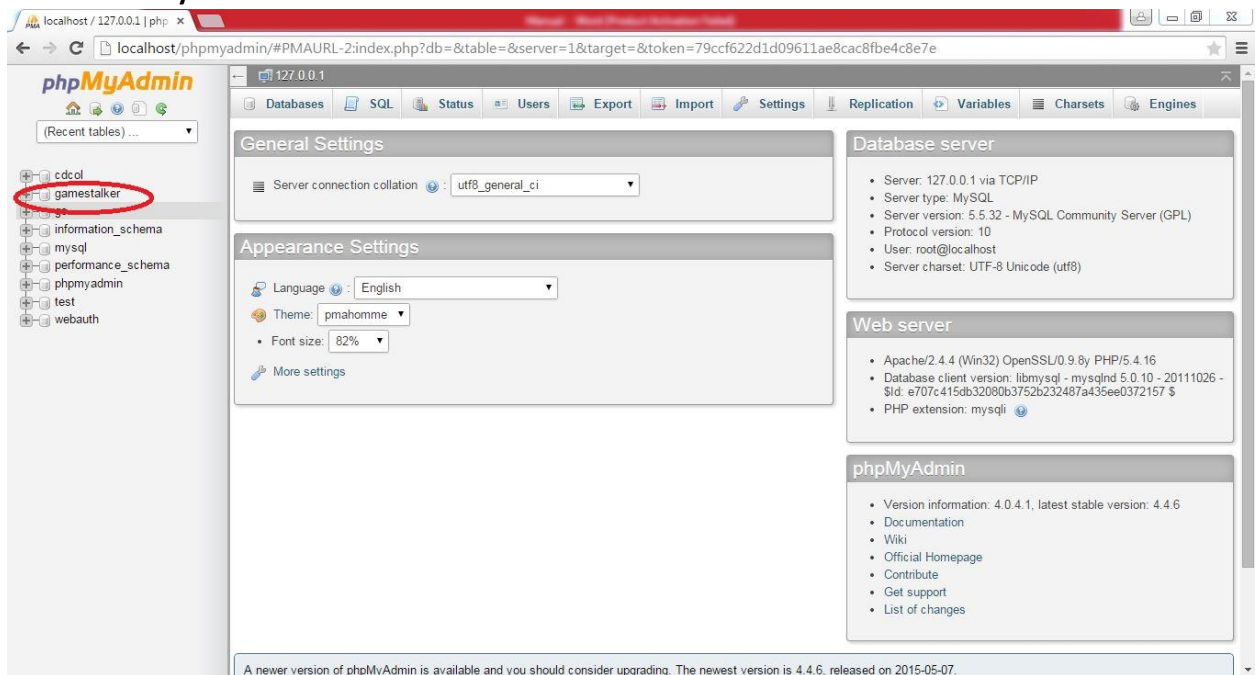

13. Click on the “Databases” tab

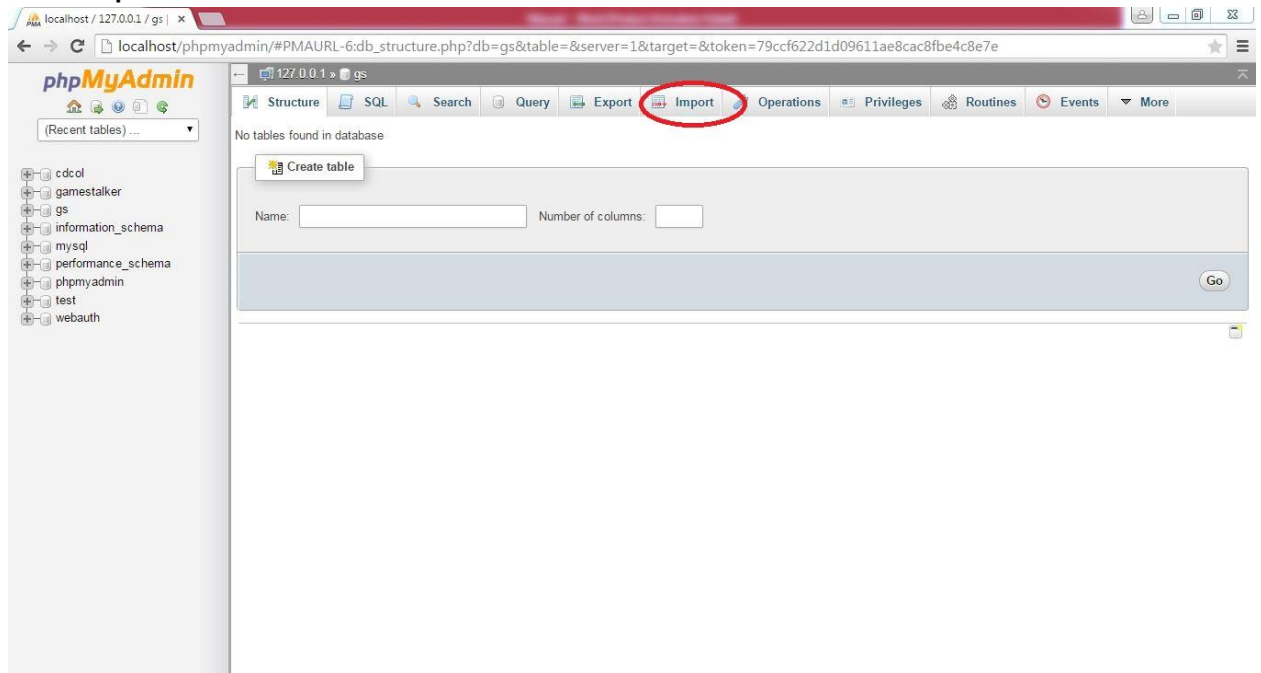

14. Create a database named “gamestalker”

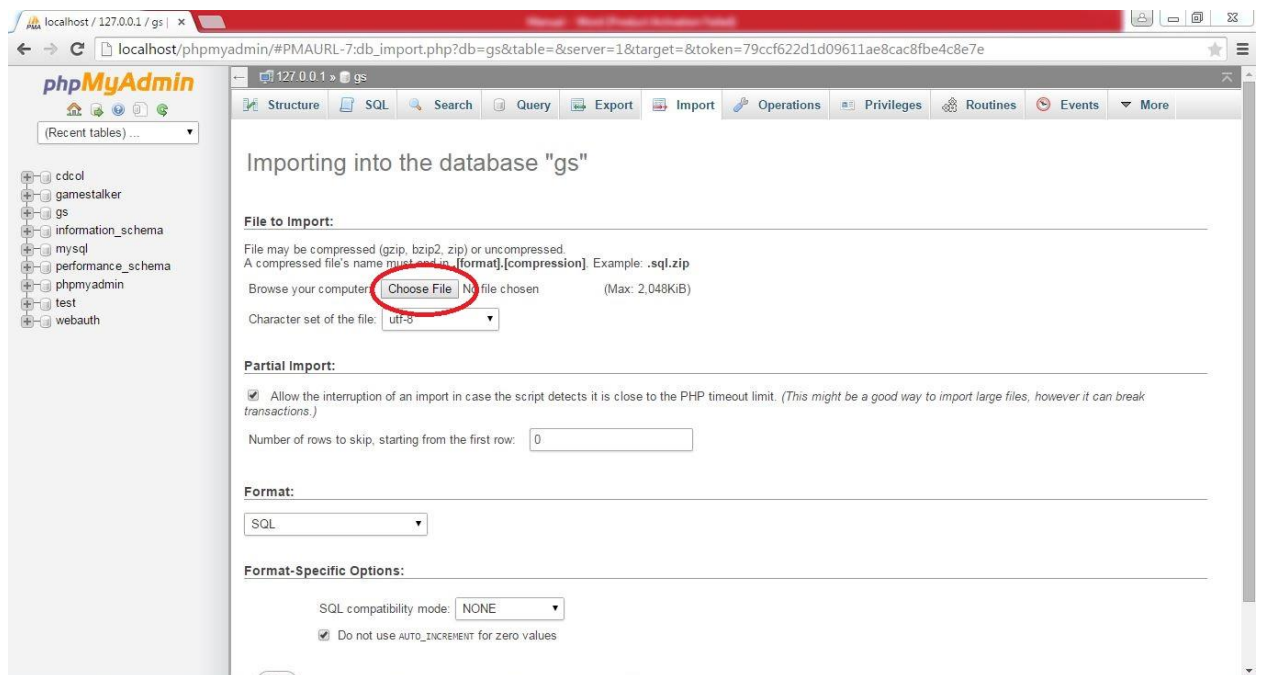

15. Click the newly created database on the sidebar.

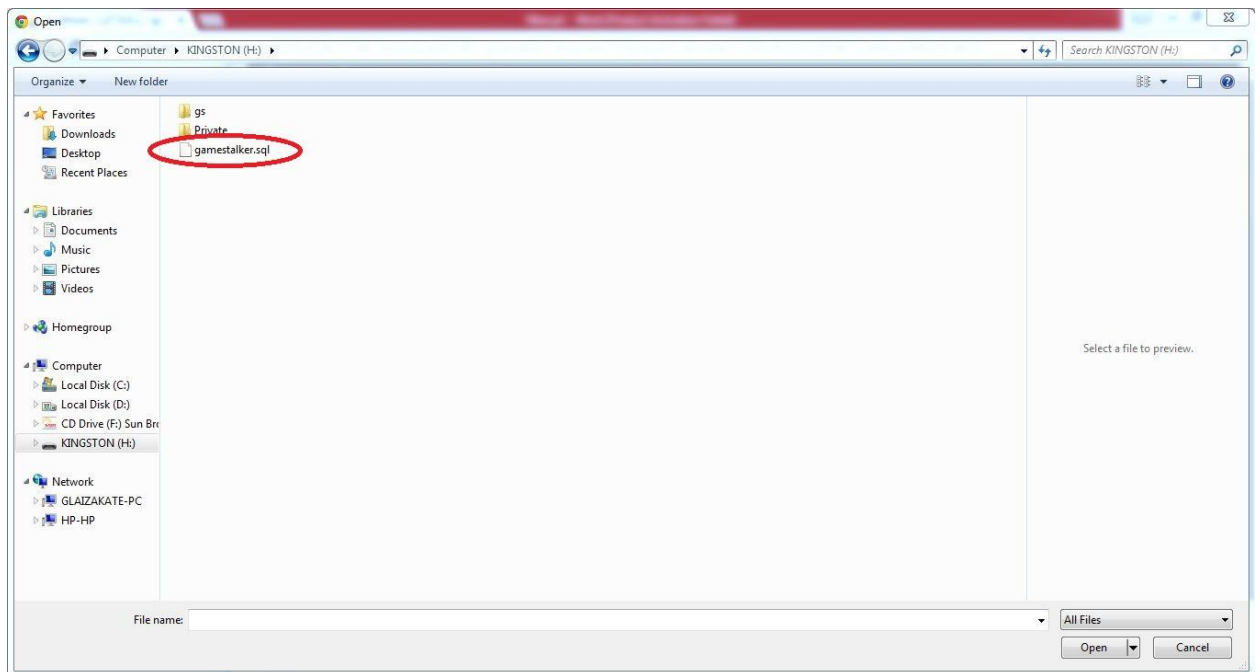

16. Click “Import” tab.

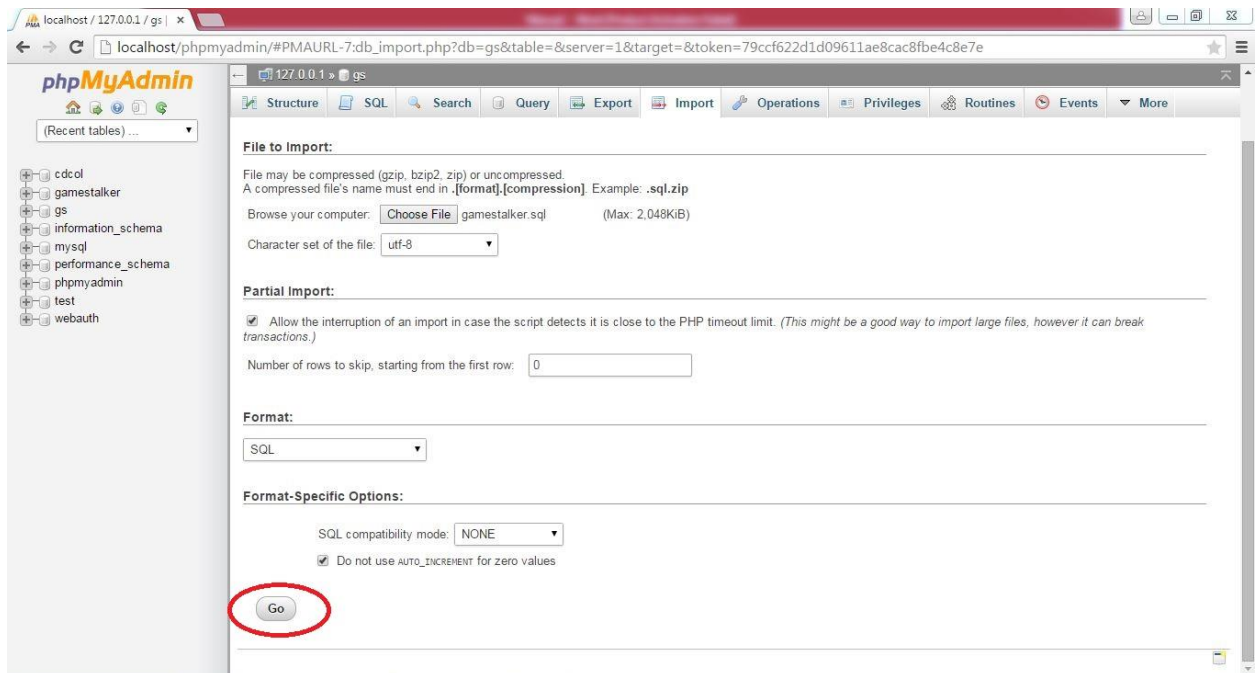

17. On that page, click “Choose File” to browse for the database.

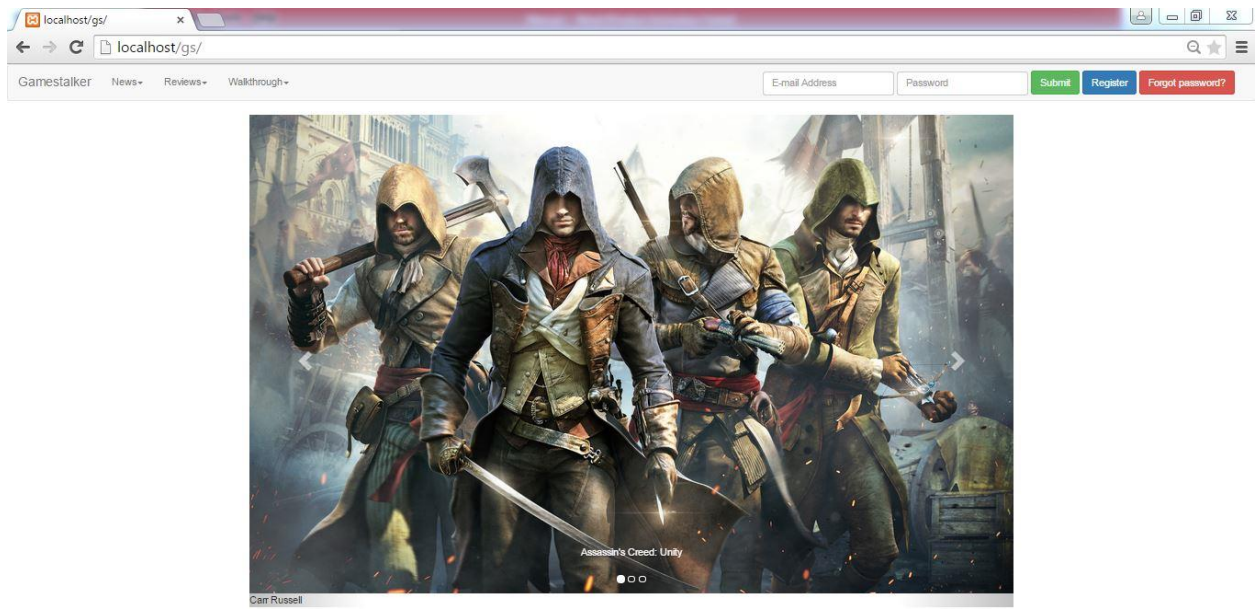

18. Look for the “gamestalker.sql” in the installation files or folder. Then click “Open”

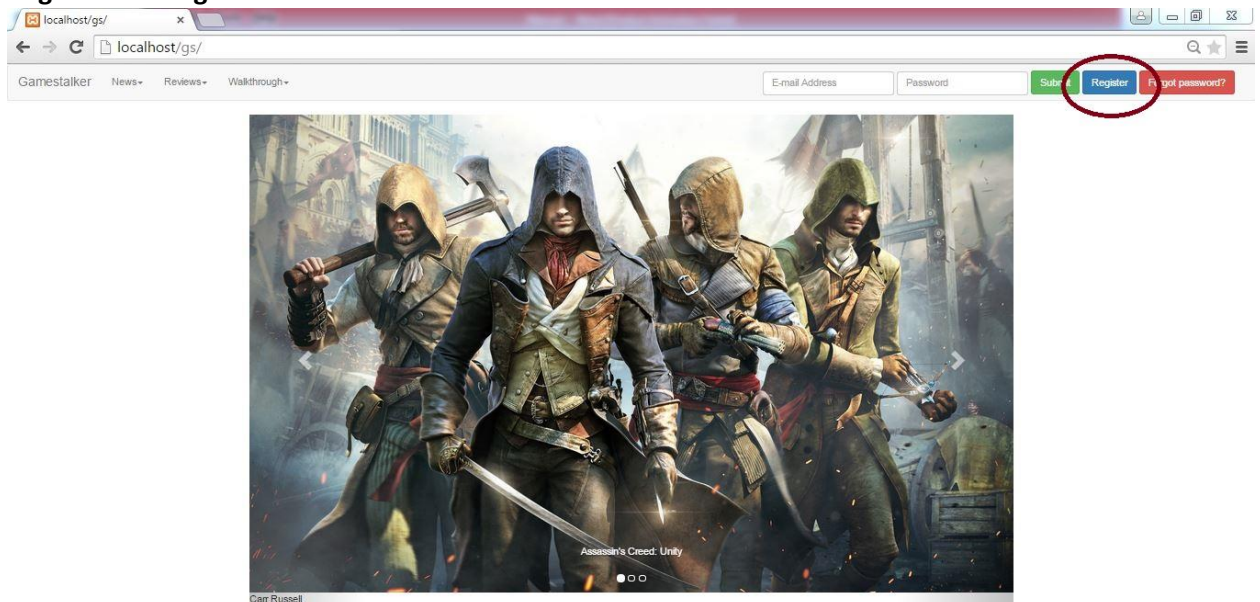

19. Click “Go”

20. Open a new tab or browser window and type this link “localhost/gs”

21. Register and Log in.

22. Log in with this default registered users:
